DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4, 5, and 8-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach a method for controlling the speed of a motor comprising measuring the motor speed, measuring the load speed, multiplying the motor speed by a parameter α that has a value between zero and one resulting in a weighted motor speed, multiplying the load speed by $1-\alpha$, where α is a number zero and one resulting in a weighted load speed, combining the weighted motor speed and the weighted load speed, and controlling the motor using the combined value. The prior art made of record does not also teach a method for controlling motor speed comprising measuring the motor speed, measuring the load speed, computing a weighted difference between the measured motor speed and the measured load speed by multiplying a difference between the motor speed and the load speed by a parameter α , which has a value between zero and one, adding the measured load speed to the weighted difference to obtain a combined signal, and controlling the motor using the combined speed value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
